Fax No. +1 908 647 2517

23 April 2004

Dear Mr Osman,

With reference to the bench and field testing of TIFA 100E Fogging Machine, I am pleased to inform you that the above-mentioned pesticide application equipment has successfully passed the requirements of the Scheme and wish to invite TIFA Ltd. to submit draft specifications for the equipment to be considered by WHO.

Noting that there is no WHO guideline specification for dual purpose application equipment, the close collaboration of your company with the newly established sub-committee within GCDPP, to develop "performance-based" guideline specifications for such equipment is crucial. The letter of certification of WHO has to refer to the WHO specification for such equipment, and therefore, will be provided when the specifications have been finalized and published.

As for testing new application equipment (TIFA ULV PLUS, your facsimile of 21 April 2004 is referred), we wish to propose delay in such testing/evaluation until the WHO guidelines for testing pesticide application equipment are reviewed by the above-mentioned sub-committee and that guideline specifications for single and multi-purpose units are proposed.

I will be very happy to provide you with further information on the above, as and when required.

With kind regards.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'M. Zaim'.

Dr M. Zaim
